PRODUCT DATA INFORMATION

SEWEREX

DESCRIPTION

A concentrated compound designed for sewer line cleaning and removing blockages. **SEWEREX** will also attack and dissolve stubborn roots that penetrate sewer lines.

CHEMICAL PROPERTIES

COMPOSITION	Blend of alkali, surfactants and inhibitors
pH	13.5 – 14.0
SG	0.96 – 1.12gm/cc

USES

SEWEREX has a delayed action which permits it to reach obstructions before going to work on all organic matter. Certain industrial organic waste may give off explosive gases when in decomposing sewer environments. SEWEREX contains material to reduce these gases.

METHOD OF USE

As obstructions in sewers vary in type and size the quantity of **SEWEREX** to add to a system will need to be a trial and error process. Add product in quantities no larger than 5 Kg at a time at a point as close as possible behind the obstruction. For best results there should be water movement. If there is none, run water by means of a hose pipe into the sewer immediately after adding the product. This will aid the product to get to the blockage. Repeat application until obstruction is cleared.

PRECAUTIONS

Use rubber gloves; avoid contact with skin or clothing.

Keep container tightly closed and away from moisture.

GENERAL INFORMATION

During reaction product gives off considerable heat. If too much product is added at one time, reaction may become too active, causing splashing and excess vapours.

Do Not stand directly over opening after product has been added. .

Safe to use in all industries.

KEEP OUT OF REACH OF CHILDREN
