

**PRODUCT DATA INFORMATION**

**ALL-IN-ONE**

**DESCRIPTION**

Master penetrant, corrosion retardant, lubricant and water repellent.  
Never Dries  
 Non-toxic.

**CHEMICAL PROPERTIES**

pH	5.5
SG	0.930
TLV	500 Units
FLASH POINT	66 <sup>o</sup> C

**VITAL INFORMATION**

Harmless to automotive finishes, metals, rubber, neoprene and plastics. Contains **no** silicone and is non-conducting. ISCOR RESEARCH DEPARTMENT states it has very effective preferential wetting properties i.e. it is surface active and displaces a film of water adhering to a surface.

**METHOD OF USE**

Penetrates, breaks down rust and scale, works into metal's pores to unfreeze hard-to-budge parts. Lubricates working parts between close tolerances. Displaces moisture and is especially effective on electrical equipment such as ignition systems, circuit boards and for removing moisture in humid conditions. Retards corrosion by leaving a lubricated film that resists oxidation. Spray all parts before dismantling or before putting them back together again.

**SAFETY PRECAUTIONS**

Contents are flammable and are under pressure. Keep in a cool place away from heat or open flame. Avoid contact with skin, may cause irritation. **Use with adequate ventilation.** If product comes into contact with...

SKIN	Wash with soap & water for 15min
EYES	Remove contact lenses. Flush with water or saline for 15min
INGESTION	Do not induce vomiting. Get medical attention

**KEEP OUT OF REACH OF CHILDREN**
