

PRODUCT DATA SHEET

MX-90 S Asbestos Encapsulator

DESCRIPTION

MX-90 S Asbestos Encapsulator is a water soluble, environmentally friendly bridging & penetrating encapsulant for Asbestos. MX-90 S Asbestos Encapsulator will penetrate and bind friable asbestos and contain and stabilise any loose fibers, to allow workers to safely handle the Asbestos while removing for safe disposal. MX-90 S Asbestos Encapsulator is also widely used in the encapsulation of natural forms of Asbestos such as crocidolite and chrysotile.

METHOD OF USE

MX -90 S Asbestos Encapsulation can be applied by hand, with a low-pressure backpack sprayer or with high pressure equipment.

USES & Benefits

- Extremely fast application and drying time
- Tack Free in minutes.
- Excellent adhesion
- Protects and repairs any damaged Asbestos.
- Seals exposed edges.
- Eliminates fibre release.
- Non-Toxic
- Algae & Moss resistant
- Fire retardant
- UV Resistant
